About Me

Backend web developer specializing in PHP and Laravel, experienced in API development, database management, and backend optimization. Strong problem-solving, adaptable to new technologies, and focused on delivering scalable solutions.

Professional Experience

Insomniacs Digital Private Limited, Bhavnagar | Web Developer

October 2023 - Present

- Built and integrated JSON APIs for multiple live projects, including Humin Admin, BHK Voice, and Gatekeeper App, ensuring seamless data flow with frontend.
- Developed a custom CMS with API-driven backend, improving content management and client usability.
- Collaborated with a 22-member team on large-scale projects, managing backend API development and optimization.
- Enhanced team efficiency by ensuring smooth jQuery AJAX API binding across platforms.

OM Data Entry India, Ahmedabad | Web Developer February 2023 – October 2023

- Designed and deployed a Custom HRMS (Employee attendance, leave & overtime management) using Core PHP, MySQL, JS.
- Improved frontend usability by integrating modern UI changes and debugging production issues.
- Acted as the link between project managers and developers, ensuring accurate implementation.

OM Data Entry India, Ahmedabad | Process Associate May 2022 – February 2023

- Managed data-driven projects with accuracy and efficiency.
- Coordinated with teams to deliver client-ready solutions on time

Zaveri Computers | Computer Hardware Technician *April 2014 - Dec 2021*

- Installed and maintained hardware/software systems and networks.
- Supported businesses with client-server architecture setups.
